

Mural Proposal - Community Kitchen Version 2

Proposed on 9/2/2021 by Sydney Kit

Kit.Frank.Art@gmail.com

SydneyKit.com

Overall

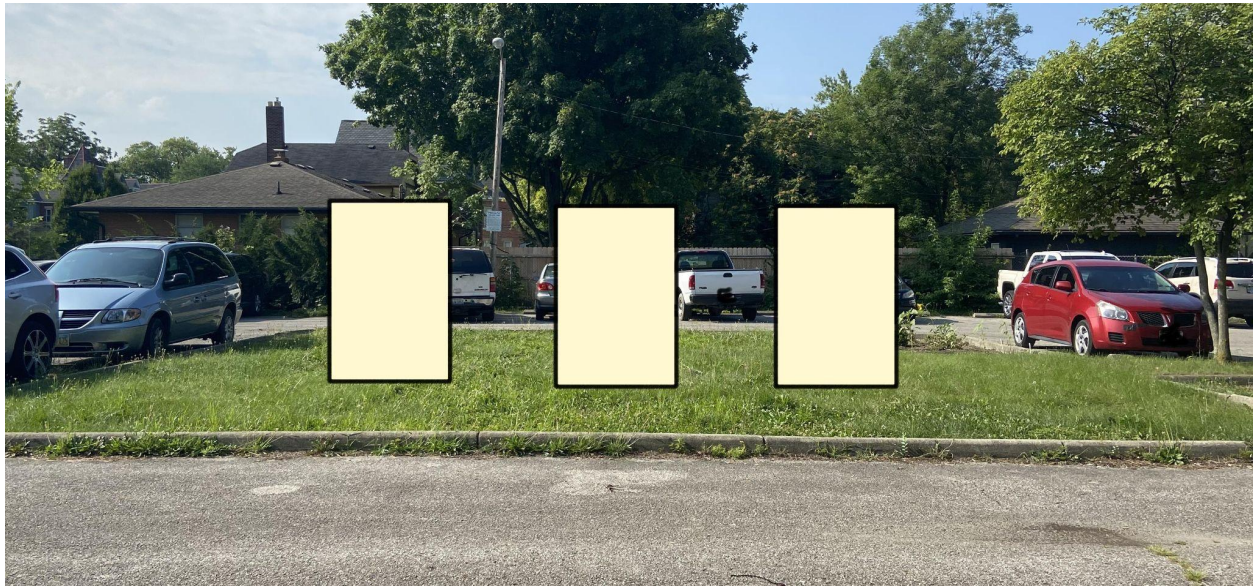

This project will consist of 3 semi-permanent structures with two murals on both sides of each structure.

The project's murals and construction will be completed by Sydney Kit and assisted by the community.

This proposal sheet will explain each mural and the construction of each. Detailed images of the murals will be completed after this proposal is accepted.

Parking Lot Mural

The parking lot mural will consist of three semi-permanent boards. On each side of the boards there will be murals that depict what programs the Community Kitchen / church offers along with the community itself.

These structures will be constructed out of 8ft x 4ft boards. They will be stylized like the black/white boards that cafes and businesses put out in front of their stores.

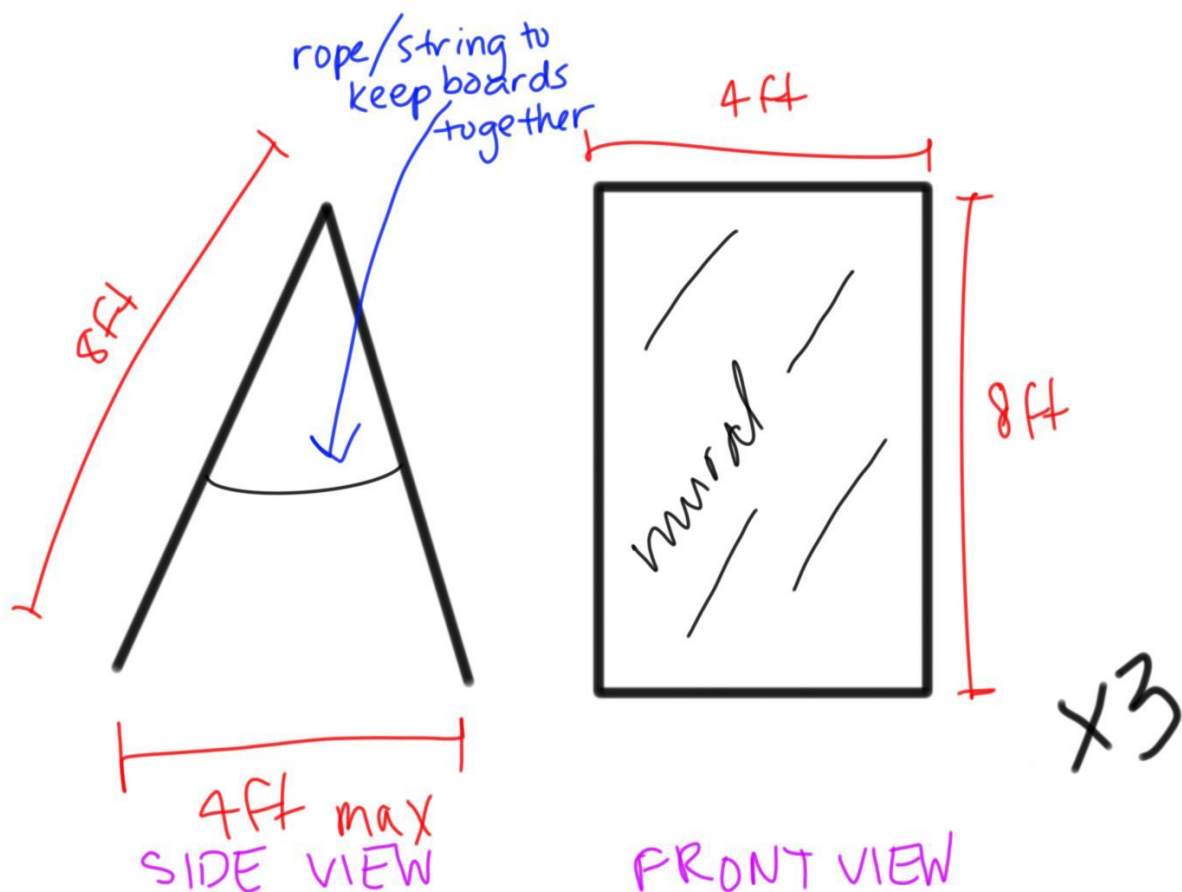

As an addition, there will be two gardens added in the parking lot to add more life to the area.

Assembly

I propose a "Community Day" where we invite members of the parish and the community to help create these murals. This community Day will be marketed to the parish and community so that we can have a wonderful turn out to celebrate the various programs that are offered.

Prior to the community day, the boards will be constructed and installed. The predetermined murals will be outlined on the selected surfaces, ready to be colored in by the community.

During the community day, members of the parish and community will be given supplies, such as paint and paint brushes, to fill in the murals. Along with the murals, plants and seeds will be planted in the gardens in the parking lot mural.

After the community day, Sydney Kit will come back and re-outline the murals where it is needed.

Mural Designs

This design and more designs will be featured on the boards. Six total designs will be completed.

Since the community is coloring in the murals, the end product could look like anything!
